

Heating Replacement Programme

Specification

Below is a sample of the boiler and radiators required upon your individual property survey and design visit. All boilers fitted throughout Harrow are from the Vaillant 6 (system) and Vaillant Pro (combi) series

Vaillant Ecotec Pro 24/28 (combi)

Vaillant Ecotec 615/618 (system)

The Vaillant Ecotec range are 'A' rated boilers which have an excellent efficiency of 91.2%.

As these boilers are 'A' rated they will provide efficient heating and subsequently reduce fuel bills and carbon dioxide emissions.

The boiler fitted will be determined by a few factors; the type of property, the water pressure coming into your building and the property layout.
