Staff should not try to deal with any such incidents personally. All managers have a responsibility to take immediate and appropriate action to respond to all security reports they receive from staff.

Each of the Parties will inform the other immediately of any incidents or activities that suggest non-compliance with any of the terms of the sharing agreement. This includes 'near miss' situations even if no actual damage to or loss or inappropriate disclosure of the information results.

If a data breach or incident did occur, the responsible Party will also notify the other Party within 24 hours of becoming

aware of the breach and support the other party to consider what steps should be taken to remediate the incident, and or report the incidence within 72 hours of becoming aware of the breach.
