HA5 1ES **App Type:** TPO

Proposal: T1 - Quercus robur - Reduce crown back to previous pruning points (reducing the re growth by approximately 3.5 meters off the height and reduce the lateral branches by 2 meters). Reduce branches overhanging neighbours garden insuring the tree is still balanced. T2, T3 & T4 - Fraxinus excelsior - Reduce crown back to previous pruning points (reducing the re growth by approximately 3.5 meters off the height and reduce the lateral branches by 2 meters). Reduce branches overhanging neighbours garden insuring the tree is still balanced. T6 & T6 - Acer pseudoplatanus - Reduce crown back to previous pruning points (reducing the re growth by approximately 3.5 meters off the height and reduce the lateral branches by 2 meters). Reduce branches overhanging neighbours garden insuring the tree is still balanced. The reason for the above works is that it is good arboricultural practice to maintain previously reduced trees to mitigate against failure. Also, to stop the trees overwhelming a back garden environment.
